

Your Saskatchewan Party Government: Putting Patients First

**Nancy Heppner, MLA
Martensville**

Premier Brad Wall

Since 2007, our government has lowered surgical wait times, recruited more than 800 new nurses and increased physician training here in Saskatchewan.

This year, we increased the health budget for physician recruitment and training, established a helicopter air medical service and invested an additional \$250 million in health regions to meet the health needs of our growing population.

We invested \$200 million into the province's first-ever Children's Hospital.

Work continues on the replacement of 13 long-term care facilities for seniors across rural Saskatchewan.

We will continue to take action that puts patients first.
